

# TEMPORARY OPERATING INSTRUCTION (TOI)

Date: 02 July 2018

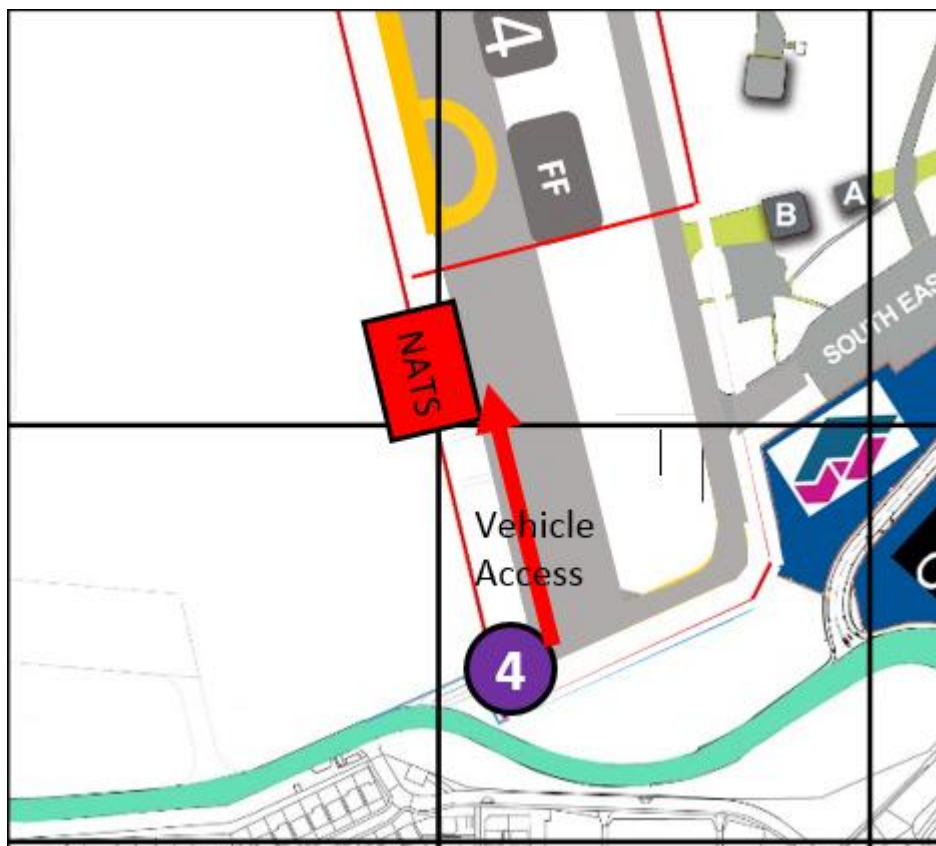

Validity: 02 July 2018 until superseded

Subject: Echo Taxiway works and Operating Procedures

---

Dear Airport Users,

Works are due to start for the installation of the NATS Radar building and contractors will require use of the Echo taxiway south of the fuel farm.

Contractors will be utilising crash gate 4 for works access and have all received an airside brief.

To ensure safe operations aircraft will be required to navigate to the eastern side of taxiway to remain clear of works and ensuring adequate separation exists between the aircraft and fencing.

**Please be aware that no taxiway markings will be changed during the works.** The works will involve the build of a NATS Radar Tower and is planned to take approx. 3-4 months.

This TOI will be published on the official Airport website for visiting aircraft and pilots to view, and updates the content of the Aerodrome Manual and visitor briefing until recinded or updated.
